

VAIL Titan Select, Patina Green

It's a change
for the better.

*Choosing a VAIL Titan Select roof gives
your home a fresh new look that is built
to last with virtually no maintenance.*

- **Stands up to harsh conditions.**
Solid metal construction provides exceptional resistance to extreme temperatures, high winds and heavy snow loads.
- **No hassles. No worries.**
VAIL Titan Select is easy to care for. No painting or repair is needed to keep it looking like new.
- **Locks tightly in place.**
A special interlocking system locks metal panels on all four sides to keep them firmly in place, even in high wind areas.
- **High-performance materials.**
VAIL Titan Select is made from durable, high-quality materials that deliver outstanding performance and weatherability.

VAIL Titan Select

f r o m C u s t o m - B i l t M e t a l s

VAIL Titan Select shingles provide the timeless style you want and the durability you need. Heavy-gauge metal construction ensures that they can stand up to what nature dishes out, including extreme temperatures and high winds. A tough, interlocking shingle design means that the shingles will stay put and keep moisture out. In addition, a lifetime warranty from Custom-Bilt Metals means you can enjoy complete peace of mind.

One look at *VAIL Titan Select* shingles and it's easy to see how beautiful they are going to be on your roof. With its distinctive styling and broad range of colors, *VAIL Titan Select* lets you create just the right look to express your personality.

- Interlocking tab system creates a waterproof channel and aligns panels during installation.
- Solid Galvalume construction provides exceptional resistance to high winds and snow loads.
- Patented interlocking system locks panels securely in place on all four sides.
- Lightweight panel eliminates costly structural upgrades.
- Patented hem design prevents wind uplift and moisture penetration.
- Folded seams create classic interlocking shingle design.

It's a new face on exterior design.

VAIL Titan Select panels are folded at intervals across the panel to give the appearance of

traditional dimensional shingles. They are installed "shingle fashion," progressing upward and across from right to left to create a seamless, attractive installation. A broad array of colors means that you can

perfectly coordinate your roof with your home's exterior color scheme.

It's uncompromising performance.

VAIL Titan Select shingles are made of heavy-gauge, Kynar-coated Galvalume panels. They are ideal for all areas, especially those that experience severe weather. In most areas, the panels can install easily over existing asphalt roof materials. Their interlocking design makes it virtually impossible for moisture to penetrate the roof deck.

Energy Efficient.

Featuring the TITAN Cool Roof Reflective Paint System. Our reflective paint features BASF and Kynar 500 reflective pigmentation technology to deliver highly efficient cooling performance.

Product Specifications

Panel length34-5/8" long
Panel width.....12" wide
Exposure area per panel32.5" x 11.25"
Panels per square39
Weight per panel2.7 lbs., 26 gauge
Weight per square107 lbs., 26 gauge

Product Material:

VAIL Titan Select:
26-gauge Kynar 500-coated Galvalume,
available in a variety of distinctive colors.

Installation Clips:

Two installation clips required per panel,
78 per square. Clips also required for hip
or ridge flashings, 2 per 12" piece.

Trim Flashing:

All trim flashing available in 10' lengths. Flat
stock also available for contractor fabrication.

Packaging:

Product delivered in 35" x 7.5" x 13" boxes
containing 13 panels each; 3 boxes equal
one square.

Product Test Results:

Fire Rating.....Class A*
Wind Resistance.....110 mph**
Hail Resistance.....Class 4 per UL® 2218

Product Certifications:

ICBO ES Report No. ER-5318
Dade County approved (Acceptance No.
04-0920.01). The products have passed
wind-driven rain testing at the maximum
attainable, 110 mph with 8.8" of
water introduced.

* Fire rating test per ANSI/UL® 790
** UL® Wind Resistance Rating, UL® Standard 997
